

**Standard 3 - Demonstrate transferable knowledge, skills, and practices in human development**

	7th FCS	8th FCS	Interpersonal Relationships	Child Dev I	Child Dev II
<b>Benchmark A: Demonstrate career and employability skills.</b>					
	List careers in early childhood, education, and services fields.			Investigate and compare careers in early childhood care and education.	Investigate and compare careers in early childhood care and education.
<b>Benchmark B: Illustrate the ages and stages of social development across the life span.</b>					
	Apply social development characteristics to the care of pre-school age children.		Evaluate the implications of aging on the individual's relationship with family and friends.	Identify milestones in the social development of the infant and toddler, and recommend strategies to promote growth.	Distinguish different stages in the social development of preschool children and design appropriate activities.
			Consider and critique theories of dating and mate selection.		Observe the behavior of children and make inferences about their social development.
<b>Benchmark C: Illustrate the ages and stages of physical development across the life span.</b>					
	Describe differences between large and small motor skills and provide examples.		Evaluate the implications of physical aging on the lifestyle of an individual.	Identify milestones in the physical development of the infant and toddler, and recommend strategies to promote growth.	Distinguish different stages in the physical development of preschool children and design appropriate activities.
	Apply physical development characteristics to the care of pre-school children.			Distinguish different stages in prenatal development, and hypothesize the effects of different influences on a fetus.	Observe the behavior of children and make inferences about their physical development.
<b>Benchmark D: Illustrate the ages and stages of cognitive development across the life span.</b>					
	Apply cognitive development characteristics to the care of pre-school children.		Evaluate the implications of cognitive aging on the lifestyle of an individual.	Identify milestones in the cognitive development of the infant and toddler, and recommend strategies to promote growth.	Distinguish different stages in the cognitive development of preschool children and design appropriate activities.
				Analyze the effects of prenatal influences on cognitive structure and development.	Observe the behavior of children and make inferences about their cognitive development.

**Benchmark E: Illustrate the ages and stages of emotional development across the life span.**

			Investigate human responses to death and aging, and hypothesize coping mechanisms.	Identify milestones in the emotional development of the infant and toddler, and recommend strategies to promote growth.	Distinguish different stages in the emotional development of preschool children and design appropriate activities.
					Observe the behavior of children and make inferences about their emotional development.

**Benchmark F: Illustrate the ages and stages of moral development across the life span.**

				Identify the moral development of a toddler, and recommend strategies to promote growth.	Distinguish different stages in the moral development of preschool children and design appropriate activities.
